Technical catalog of residential air conditioners

Dear Business Partners,

We would like to introduce you to the new Sinclair technical catalog.

It is a comprehensive source of information for the complete residential Sinclair air conditioning line. You will find such technical information as permissible pipe lengths, recommended circuit breakers etc. Technical catalog further offers sketches of dimensions and appearance of units, diagrams of electrical connections, but also detailed accessories information and a list of error messages. Catalogue is available in B2B section and of course in printed form.

With this new catalog you will have all information easily accessible in one place. We believe this new tool will help you when communicating with customers and when providing installation and service.
