SDG-01 Sinclair Dry Contact Gateway

SDG-01 is an optional accessory for indoor units of UNI SPLIT series (ASC-xxBI, ASD-xxBI, ASF-xxBI). It consists of module fitted with external contacts to provide safe shutdown, runtime tracking and error checking.

Module enables to turn on/off, force shutdown the unit and externally switch between cooling and heating. The output signals are giving information of runtime data, error, mode, plasma generator and fan of indoor unit.

Module has to be connected directly to connector located on the PCB of indoor unit via 4-core wire that is included in the package and it's length is 9 m.
