# WIRED CONTROLLER MODULAR CHILLERS AND HEAT PUMPS

### **USER MANUAL**

**KJRM-120H2** 

- This manual gives detailed description of the precautions that should be brought to your attention during operation.
- In order to ensure correct service of the wire controller please read this manual carefully before using the unit.
- For convenience of future reference, keep this manual after reading it.

## **Restore initialization**

If the user accidentally sets the display language of the wire controller to a language that the user does not know, the following three steps can be used to restore the wire controller to the factory setting and reset the display language:

1)Power off the wireline controller and power it on again. Press and hold 🖨 + 🔿 + 🔒 to enter the following page within 60 seconds.

3)Power off the wireline controller and power it on again. The display language will be reset. Press "A"" "" " " " be "to select the language of the remote controller. After the language setting is completed, click " " " " be" to select "YES", and then click " " to enter the SETTING ADDRESS interface. After setting SETTING ADDRESS, click" to enter GENERAL SETTING. Then after setting GENERAL SETTING, click " " .

# **1 Safety Precautions**

The product and Operation and Installation Instructions record the following content, including the operation method, how to prevent harms to others and property losses, and how to use the product correctly and safely. Read the text after understanding the content (identification and marker maps) below carefully, and observe the precautions below.

### A Caution

Read the safety precautions carefully prior to installation. The important safety precautions are provided below and must be observed. Meanings of marks:

A Caution Means improper handling may lead to personal injuries or material damages.

A Warning Means improper handling may lead to death or serious injury. After the installation work is completed, confirm that the trial operation is normal and hand over the manual to the customer for keeping.

[Note]: So-called "injuries" mean the harms not requiring hospitalization or long-term treatment, generally referring to wounds, burns, or electric shocks. Material damages refer to property and material losses.

# **1 Safety Precautions**

| Icon      | Name  |
|-----------|---|
| $\otimes$ | It indicates "prohibited". The specific content of prohibition is provided using<br>graphics or text in the icon or nearby. |
| (!)       | It indicates "mandatory". The specific mandatory content is provided using graphics<br>or text in the icon or nearby.       |

| (Narning          | Entrusted installation |  |  |
|-------------------|------------------------|--|--|
| $\bigcirc$        | Prohibited             | Do not spray combustible spray to the wired controller directly; otherwise a fire may be caused.   |  |
| Caution<br>in Use | Prohibited             | Do not perform operations with a wet hand or allow water to enter the wired controller;<br>otherwise the wired controller will be damaged. |  |

### ▲ Caution

• Do not install the product at a place where flammable gas easily leaks. Once flammable gas leaks and stays around the wired controller, a fire may be caused.

# 2 Overview of Wired Controller

### Basic using conditions:

1)Power range: power input: AC 8V  $\sim$  12V;

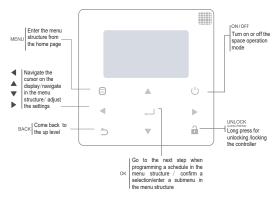

2)Operating temperature: -20  $\mathrm{C}$   $\sim$  60  $\mathrm{C}$  ;

Operating humidity: RH40%~RH90%;

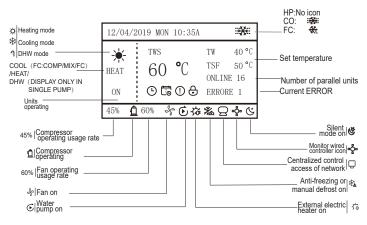

Where: HP-HEAT PUMP;CO-ONLY COOLING;FC-FREE COOLING.

It's a general manual. The functions of different models are different. The wired controller automatically recognizes and hides irrelevant interfaces. Please set and inquire related parameters according to the outunit model.

### 2.1 Operation Interface Description

# 2 Overview of Wired Controller

Set temperature:TWS/T5S:SETTING TEMPERATURE;TW:TOTAL OUTLET WATER TEMPERATURE, T5:TANK TEMPERATURE;TSF:SAFE TEMPERATURE;

DAILY TIMER / WEEKLY SCHEDULE / ERROR / LOCK

## **3 Function Introduction**

Power on for the first time or restore factory settings, you need to preset: SETTING ADDRESS and GENERAL SETTING. Click " and " after setting. Please follow the interface prompts.

### 3.1 Unlocking/Locking Operation

When the wired controller is locked, press and hold the " 🔒 " button for 3s to unlock it. Then the lock icon is not displayed and the wired controller can be operated.

When the wired controller is unlocked, press and hold the " a " button for 3s to locked it. Then the lock icon is displayed and the wired controller cannot be operated. When there is no operation for continuous 60s on any page, the wired controller returns to the home page and automatically locks, displaying the lock icon.

Note: It can only be locked by long pressing the " 🔒 " button for 3s under the main page, and it is invalid under the " 🖨 " page.

| 12/04/2019 MON 10:35A    | 12/04/2019 MON 10:35A |
|--------------------------|-----------------------|
| COOL 7 °C ONLINE 16 ON ↔ | COOL 7°C ONLINE 16    |

### 3.2 Power-on/off

When the wired controller is unlocked and the unit is on, " $\bigcup$ " can be pressed to power off the unit under the home page only. And it can be pressed to power on the unit when the unit is off.

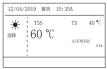

In the unlocked state, the set temperature can be adjusted by pressing▲▼button. And you need to Press "→"button to confirm after setting. It's invalid without confirmation within 5s.

### 3.3 Mode Setting

Cycle: Cooling-->Heating-->DHW-->Cooling. Skip the mode cycle when there is no corresponding mode. The DHW mode is divided into single pump (no need to select the address) and multiple pumps (need to select address 00-15, and the address of the unit without DHW function is directly skipped).

Only Tws/T5s and address can be set in cooling, heating and DHW mode. Tw/T5 can only be displayed but not be set. DHW can only be power on/off under the MODE setting.

HP-Cooling setting range lower limit is subject to the low water outlet control setting under SERVICE MENU. CO/FC-Cooling setting range lower limit is subject to the lowest outlet water temperature set by antifreeze ratio under PROJECT MENU.

# Note: When the setting temperature is lower than 5 C, the water-side system must increase more than 15% of antifreeze, otherwise there will be a risk of damage to the unit.

Press " $\_$ " to save the settings after setting and back to homepage. Or press"  $\_$ " to back. When there is no operation for continuous 60s, it will save the settings and back to homepage.

### 3.4 Menu Setting

The default selection is "MODE" and choose the menu you need by pressing "▲▼". Press "↓" to enter its submenu or back to homeage by " △". Back to homepage if there is no operation for 60s under menu page.

Note: the mode menu is invalid when the unit is controlled by modbus or host computer and display as above.

#### 4.3.6.1 USER MENU

Select "USER MENU" to enter the user menu. The interface display is as follows:

| USER MENU       |  |
|-----------------|--|
| QUERY           |  |
| TIMER           |  |
| GENERAL SETTING |  |
| DOUBLE SETPOINT |  |
| OK 1/2 ♦        |  |

| USER MENU           |   |
|---------------------|---|
| SNOW-BLOWING SWITCH |   |
| SILENT SWITCH       |   |
| DHW SWITCH          |   |
|                     |   |
| ОК 2/2              | ¢ |

Users choose functions by "▲ ▼".

Select "QUERY" in the "USER MENU" interface to access the query function. The interface display and operation are as follows:

| QUERY                |   |
|----------------------|---|
| STATE QUERY          |   |
| TEMP QUERY           |   |
| HISTORY ERRORS QUERY |   |
|                      |   |
| OK                   | ¢ |

State query Select "STATE QUERY" and press" \_\_\_\_ ". Display as follows:

| STATE QUERY     |                              |
|-----------------|------------------------------|
| SELECT ADDESS   | <ul> <li>▲ 11 ▶ #</li> </ul> |
| OPERATION STATE | STANDBY                      |
| RUNNING MODE    | COOL                         |
| CURREN SLIENT   | NIGHT                        |
| MODE            | SILENT1                      |
| BACK            | •                            |

Select address by pressing " $\blacktriangleleft$ ", " $\blacktriangleright$ " "to view the status of the unit at that address. Back to upper menu by " $\bigcirc$ ".

#### 

| TEMP QUERY             |          | 1 |
|------------------------|----------|---|
| SELECT ADDESS          | I 11 ▶ # | 1 |
| INLET WATER TEMP       | 25       | Ì |
| OUTLET WATER TEMP      | 25       | ţ |
| TOTAL OUTWATER<br>TEMP | 25       | ł |
| AMBIENT TEMP           | 25       | ł |
| BACK                   | 40       |   |

Select address by pressing "  $\blacktriangleleft$  ", "  $\blacktriangleright$  " to view the temperature of the unit at that address. Back to upper menu by "  $\bigtriangleup$  ".

History errors query

Select "HISTORY ERRORS QUERY" and press" 🔶 ". Display as follows:

Select address by pressing " ◀", " ▶" to view the history errors of the unit at that address. Press "▲" "▼" to choose the history error that you want and the number of errors that can be viewed is 16.

Timer setting

| TIMER<br>DAILY TIMER |   | TIMER<br>DAILY TIMER (DISABLE) |
|----------------------|---|--------------------------------|
| WEEKLY SCHEDULE      |   | WEEKLY SCHEDULE (DISABLE)      |
|                      |   |                                |
|                      |   |                                |
| OK                   | ÷ | OK                             |

Note: After MODBUS control and the remote control of the external machine are used, the daily and weekly time settings of the wired controller are invalid, and users cannot enter the timing menu for setting.

When MODBUS control and the remote control of the external machine are invalid. Select "DAILY TIMER" and press" ( ". Display as follows:

| DAILY TIMER |                             |
|-------------|-----------------------------|
| TIMER       | ▲ 1 ▶ #                     |
| ACT         | <ul> <li>● 0FF ▶</li> </ul> |
| TIME ON     | ◀ 10:00 ► A                 |
| TIME OFF    | ◀ 10:00 ► A                 |
| MODE        | HEAT ▶                      |
| 0K 1/2      | \$ +                        |

| DAILY TIMER |     |                             |
|-------------|-----|-----------------------------|
| TWS         |     | <ul> <li>40 ▶ °C</li> </ul> |
| SILENT MODE |     | ◆NIGHT ▶<br>SILENT1         |
|             |     |                             |
| OK          | 2/2 | ÷ •                         |

Only one setting is enabled between "DAILY TIMER" and "WEEKLY SCHEDULE". If any of the pattern in "WEEKLY SCHEDULE" is set to ON, "DAILY TIMER" is disabled. "DAILY TIMER" can be set across days, but "WEEKLY SCHEDULE" can't.

Users can set up to two timers, and set the ON or OFF time (set the interval of time to 10 minutes), operation mode(there are heating, cooling and DHW modes for single pump; only cooling and heating modes can be selected for multiple pumps, and it cannot be set as DHW mode ) and temperature setting for each segment of timer.

It's invalid if the ON and OFF time are same. Display as follows:

#### Operating Introduction:

Press "▲" "▼" to select TIMER, ACT, TIME ON, TIME OFF, MODE, TWS or SILENT MODE. When the cursor stays at "TIMER ", press "◄" and "▶" to select "TIMER 1" or "TIMER 2". When it stays at other items, we can also use " ◀", " ▶" to adjust corresponding settings.

After setting, press "  $\leftarrow$  " to confirm saving, or press "  $\bigcirc$  " to cancel setting and return to the previous interface.

If Time1 T.ON is set the same as Time1 T.OFF, then the setting is invalid, the ACT option for the timer of this segment jumps to "OFF", the setting of Timer2 is the same as that of Timer1, and the timing interval of Time2 can cross with that of Time1.

For example, if Timer1 T.ON is set to 12:00 and Timer1 T.OFF is set to 15:00, then the values of Timer2 T.ON and Time2 T.OFF can be set in the range of 12:00-15:00. If the time interval crosses, the machine will be powered on at the time T.ON which is set in Timer1 or Timer2, and will be powered off at the time T.OFF which is set in Timer1 or Timer2.

After the daily timer function setting is enabled, there will be corresponding prompts displayed on

the homepage.

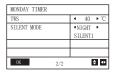

When two timers overlap, the second setting takes precedence.

#### Weekly schedule setting:

Select "WEEKLY SCHEDULE" and press" . Display as follows:

| WEEKLY SCHEDULE |                         |   |
|-----------------|-------------------------|---|
| WEEKLY SCHEDULE | ▲ MON                   |   |
| WEEKLY SWITCH   | <ul> <li>0FF</li> </ul> | • |
|                 |                         |   |
|                 |                         |   |
|                 |                         |   |
| OK              | ŧ                       | 0 |

| MONDAY TIMER |                                      |
|--------------|--------------------------------------|
| TIMER        | 4 1 ▶ #                              |
| ACT          | <ul> <li>● 0FF</li> <li>●</li> </ul> |
| TIME ON      | ◀ 10:00 ► A                          |
| TIME OFF     | ▲ 10:00 ▶ A                          |
| MODE         | HEAT     ►                           |
| 0K 1/2       | \$ ₽                                 |

Press "▲" and "▼" buttons to select "WEEKLY SCHEDULE" or "WEEKLY SWITCH". And press "◀ "or" ▶" buttons to select Monday to Sunday.

There can be up to 2 timings in a day of weekly timing, and each timing needs to be set on and off time (set interval is 10 minutes).

#### **Operating Introduction:**

Press "▲" and "▼" to select "WEEKLY SCHEDULE". Select the day you need by " ◀ " or " ▶ ", and press " ↓ " to enter it. Then you can switch between TIMER, ACT, TIME ON, TIME OFF, MODE, TWS and SILENT MODE by "▲" and "▼". Refer to the operating introduction of "DAILY TIMER". General setting:

Select "GENERAL SETTING" and press" \_\_\_\_ ". Display as follows:

| GENERAL SETTING |          |
|-----------------|----------|
| YEAR            | 4 2020 ▶ |
| MONTH           | 4 12 ▶   |
| DAY             | 4 10 ▶   |
| 12-24HOUR       | 4 12 ▶   |
| HOUR            | 4 10 ▶   |
| 0K 1/2          | \$ ↔     |

| GENERAL SETTING           |                        |    |
|---------------------------|------------------------|----|
| MINUTE                    | <ul> <li>55</li> </ul> | •  |
| AMPM                      | <ul> <li>AM</li> </ul> | ٠  |
| LANGUAGE                  | <pre> ENGLISH </pre>   | Þ  |
| BACKLIGHT<br>OFF DELAY(s) | <ul> <li>20</li> </ul> | •  |
| OK 2/2                    | ŧ                      | 40 |

Press " $\blacktriangle$ " and " $\forall$ " to select the date, time, and time format to be set. Adjust their parameters by " $\blacktriangleleft$ " or " $\blacktriangleright$ ", and press " $\checkmark$ " to save. The backlight time setting range is 10-1200s, the default is 60s, and each adjustment is 10s.

Back to previous page by " $\dot{}$  )" after setting. Only English is supported now. Double Setpoint

Select "DOUBLE SETPOINT" and press" ". Display as follows:

| DOUBLE SETPOINT |                               |
|-----------------|-------------------------------|
| DOUBLE SETPOINT | ◆DISABLE ▶                    |
| SETPOINT COOL_1 | <ul> <li>4 16 ▶ °C</li> </ul> |
| SETPOINT COOL_2 | 4 20 ▶ °C                     |
| SETPOINT HEAT_1 | <ul> <li>4 16 ▶ °C</li> </ul> |
| SETPOINT HEAT_2 | <ul> <li>4 25 ▶ °C</li> </ul> |
| OK              | \$ ₽                          |

Press "▲" and "▼" to select items and " ◀ " or " ▶" to adjust parameters.

the lower limit of the set range of HP refrigeration is subject to the low water outlet control set under SERVICE MENU, and the lower limit set for CO/FC refrigeration is subject to the minimum water outlet set under the antifreeze ratio set under PROJECT MENU.

Snow-Blowing switch

Select "SNOW-BLOWING SWITCH" under "USER MENU" page and press" ". Display as follows:

| SNOW-BLOWING SWITCH          |   |
|------------------------------|---|
| SNOW-BLOWING SWITCH<br>YES 🗘 |   |
| OK                           | 4 |

Note:Some models do not have this function. Please refer to the instructions of the outdoor machine for whether they have anti-snow control function.

Silent mode:

Select "SILENT SWITCH" and press" \_\_\_\_ ". Display as follows:

| SILENT SWITCH  |  |
|----------------|--|
| SELECT SILENT  | <ul> <li>NIGHT ►</li> <li>SILENT1</li> </ul> |
| CURRENT SILENT | NIGHT<br>SILENT1                             |
| OK             |  |

Press "▲" and "▼" to select "SELECT SILENT", press" ◀ "or" ▶" to select the mode you need (7 types: NIGHT SILENT1-4, STANDARD, SILENT and SUPER SILENT), and press " ← " to save. Users can check whether it is the mode they want here and press " ← " to back if there is no problem. Once the silent mode turned on, in homepage light up.

| NIGHT SILENT 1 | 6/10h |
|----------------|-------|
| NIGHT SILENT 2 | 6/12h |
| NIGHT SILENT 3 | 8/10h |
| NIGHT SILENT 4 | 8/12h |

Note: Night Silent1-4 is only available for SCV-XXXEB/EBH, SMHM-EXXXB-3/BH-3 series models.

#### DHW SWITCH

Press "▲" and "▼" to select "DHW SWITCH" under "USER MENU" page and press "↓ ". Display as follows:

| DWH SWITCH     |           |
|----------------|-----------|
| SELECT ADDESS  | ▲ 11 ▶ #  |
| DWH SWITCH     | ▲ YES ▶   |
| DHW FIRST      | YES     ▶ |
| 00 01 02 03 04 | 05 06 07  |
| 08 09 10 11 12 | 13 14 15  |
| OK             | \$ ↔      |

Press "▲" and "▼" to switch between SELECT ADDRESS, DHW SWITCH and DHW FIRST. Then press" ◄ " or " ▶" to adjust parameters.

Only when DHW SWITCH selects YES, the following can be set.

Note: DHW SWITCH is only available for custom made DHW models SMHM-XXXB-3/BH-3. Water Coil Control

Press "▲" and "▼" to select "WATER COIL CONTROL" and press "← ". Display as follows:

| WATER COIL CONTROL |         |
|--------------------|---------|
| COIL CONTROL       | ▲AUTO ▶ |
|                    |         |
|                    |         |
|                    |         |
| ОК                 | 4       |

Press "▲" and "▼" to select "COIL CONTROL" and press " ◀ " or " ▶" to select control mode: AUTO (automatically control), MANUALON (with water coil), MANUALOFF (without water coil). Press " ➡ " to save. Press " ➡ " to exit this page. Note: Water Coil Control is only applicable to FC models.

#### 4.3.6.2 SERVICE MENU SETTING

Password input: 234, 999

Select "SERVICE MENU" and press " - The screen prompts for a password, as shown in the figure below:

| SERVICE MENU                 |       |
|------------------------------|-------|
| PLEASE INPUT THE<br>PASSWORD |       |
| 0 0 0                        |       |
|                              |       |

press " <" or " >" to set value. Press " < 1" to confirm or " 5" to back. Note: Only applicable to SCV-XXXEB/EBH, SMHM-XXXB-3/BH-3 series models. For other models, please refer to the instructions of the outdoor machine.

#### DHW ENABLE

Press "▲" or "▼" to select "DHW ENABLE" under "SERVICE MENU" page. Press " ← " and enter submenu.

| DHW ENABLE |                        |  |
|------------|------------------------|--|
| DHW ENABLE | <ul> <li>NO</li> </ul> |  |
|            |                        |  |
|            |                        |  |
|            |                        |  |
| _0K        |                        |  |

Press "▲" or "▼" to set YES or NO. Press " ← I " to confirm or " <sup>(</sup> ) " to back. Note: DHW ENABLE is only available for custom made DHW models.

#### Factory data reset:

Press <sup>\*</sup>▲" or "▼" to select "FACTORY DATA RESET" under "SERVICE MENU" page. Press <sup>\*</sup> <sub>▲</sub> <sup>⊥</sup> " and enter submenu.

| FACTORY DATA RESET |                         |      |
|--------------------|-------------------------|------|
| DO YOU WANT TO     | <ul> <li>YES</li> </ul> | Þ    |
| RESET?             |                         |      |
|                    |                         |      |
|                    |                         |      |
| OK                 |                         | 1771 |
| UN                 |                         |      |

Press "▲" or "▼" to select corresponding item and press " ◀" or " ▶" to select restore or not. Press " ◀— " to confirm or " \_ " to back.

#### 4.3.6.3 PROJECT MENU SETTING

Password input: 9877, 5432, 6666, 9999 Select "PROJECT MENU" and press "

shown in the figure below:

The initial password must be obtained by a professional. Press the " $\blacktriangle$ " or " $\forall$ " buttons to change the number to enter, and press the " $\blacktriangleleft$ " or " $\blacktriangleright$ " buttons to change the bit code to enter. After the number is entered, the display is not changed. After entering the password, press the " $\checkmark$ " button to enter the interface; press the " $\bigtriangleup$ " button to go back to the previous interface; the display is as follows if the input is incorrect:

The query interface as follows is displayed if the input is correct:

| PROJECT MENU             |
|--------------------------|
| SET UNIT AIRCONDITIONING |
| SET PARALLEL UNIT        |
| SET UNIT PROTECTION      |

| COOL MIN TIME  |     | • 0.5 | ► h |              |                         |   |
| HEAT MAX TIME  |     | • 08  | ► h |              |                         |   |
| HEAT MIN TIME  |     | • 0.5 | ► h |              |                         |   |
| OK             | 1/2 | E     | •   | 0K 2/2       |                         | ¢ |

Press "▲" or "▼" to select item to be set and press " ◀" or " ▶" to set value. Press " ◀ " " to confirm. Back to homepage if there is no operation within 60s. Detailed setup information:

| Parameter      | Setting range |
|----------------|---------------|
| SELECT ADDRESS | 0∽15          |
| COOL MIN TIME  | 0.5~24h       |
| COOL MAX TIME  | 0.5~24h       |
| HEAT MIN TIME  | 0.5~24h       |
| HEAT MAX TIME  | 0.5~24h       |
| DHW MIN TIME   | 0.5~24h       |
| DHW MAX TIME   | 0.5~24h       |

## E9 Error time setting:

Select "SET E9 TIME" and press " 🚽 " to entry. Display as follows:

| SET E9 TIME         |   |    |     |
|---------------------|---|----|-----|
| E9 PROTECT TIME     | 4 | 10 | ▶ S |
| E9 DETECTION METHOD | • | 1  | • # |
|                     |   |    |     |
|                     |   |    |     |
|                     |   |    |     |
|                     |   |    |     |
|                     |   |    |     |

#### Inverter pump output setting:

Select "INV PUMP RATIO" and entry the following page to select pump: Use in the case of multiple pumps, do not send instructions for single pump.

| INV PUMP RATIO |             |
|----------------|-------------|
| MIN RATIO      | 4 70 ▶%     |
| MAX RATIO      | 4 100 ▶%    |
|                |             |
|                |             |
|                |             |
| OK             | \$ <b>•</b> |

Press "▲" or "▼" to select item to be set and press" ◀ " or " ▶ " to set value. Press " ◀ " to confirm. Back to homepage if there is no operation within 60s. MINRATIO setting should ensure its flow meet the requirement of the whole unit, otherwise the unit may be damaged.

| MIN RATIO | MINIMUM RATIO | 40∽MAX RATIO                         |
|-----------|---------------|--------------------------------------|
| MAX RATIO | MAXIMUM RATIO | Max (70%, MIN RATIO) $\backsim$ 100% |

## CHECK PARTS

Select "CHECK PARTS" and press "

| CHECK PARTS    |          |

Water Coil Control

Press "▲" and "▼" to select "WATER COIL CONTROL" and press "▲\_\_\_\_". Display as follows:

| WATER COIL CONTROL |         |
|--------------------|---------|
| COIL CONTROL       | ▲AUTO ▶ |
|                    |         |
|                    |         |
|                    |         |
| OK                 | •       |

Press "▲" and "▼" to select "COIL CONTROL" and press " ◀ " or " ▶" to select control mode: AUTO (automatically control), MANUALON (with water coil), MANUALOFF (without water coil). Press " 🚽 " to save. Press " 🖕 " to exit this page.

Note: Water Coil Control is only applicable to FC models.

4.3.7 Power Failure Memory Function

The power supply to the system fails unexpectedly during operation. When the system is powered on again, the wired controller continues to operate according to the status before the last power failure, including the power-on/off status, mode, set temperature, failure, protection, wired controller address, timer, hysteresis, etc. However, the memorized content must be the content set at least 7s before the power failure.

4.3.8 Parallel Function of Wired Controller

Parallel function by MODBUS:

1) A maximum of 16 wired controllers can be connected in parallel, and the address can be set in the range of 0 to 15.

2) After multiple wired controllers are connected in parallel, data is shared among them, e.g., the power-on/off function, data settings (such as the water temperature and hysteresis) and other parameters will be kept consistent (note: The mode, temperature, and hysteresis settings can be shared only when the system is powered on).

4) Since the bus is processed in the polling mode, the data of the wired controller which is set last is valid if multiple wired controllers are operated at the same time in the same bus cycle (4s). Avoid the above situation during operation.

5) After any one of parallel wired controllers has been reset, the address of this wired defaults no address and needs to be set manually in order to enter into normal communication.

Parallel function by XYE:

1) A maximum of 16 wired controllers can be connected in parallel

2) The wired controller need to set to control/monitor controller. The former has control functions, while the latter has only viewing functions.

4.3.9 Upper Computer Communication Function

1) When communicating with the upper computer, the homepage displays: Communication

between the wired controller and the upper compute.

2) If the outdoor main control board is in the remote ON/OFF control mode and the wired controller icon flash. At this point, the upper computer network control setting line control mode switch machine is invalid.

4.3.10 Monitor Wired Controller Function

When the wired controller is set to monitor wired controller, press the "

Attached Table 2: Wired control errors and protection codes

| No. | Error code | Explanation                                       | Note                          |
|-----|------------|---|-------------------------------|
| 1   | E2         | Main control and wired control transmission error | Recovered upon error recovery |
| 2   | E1         | Slave unit module reduction                       |                               |

## 5 ATTACHED TABLE ABOUT MODBUS

## 5.1 Communication specification

Interface: RS-485, H1 on the back of the controller, H2 connected to the serial port of T/R- and T/R+, H1, H2 as the RS485 differential signal. The Upper computer is the host, and the slave machine is the wired controller.

The SETTING ADDRESS interface in the SERVICE MENU can set Modbus communication Address from 1 to 64.

The communication parameters are as follows:

- baud rate: 9600bps.
- Data length: 8 Data bits.
- check: None Parity.
- Stop bit: 1 stop bit.
- communication protocol: Modbus RTU.

## 5.2 Supported function coses and exception codes

| Function code | Explain   |  |  |
|---------------|---|--|--|
| 03            | Read Holding Registers<br>Number of continuous read registers<br>per pass ≤20   |  |  |
| 06            | Write Single Register   |  |  |
| 16            | Write multiple registers<br>Number of continuous read registers<br>per pass ≤20 |  |  |

## Exception code specification

| Exception code | MODBUS<br>name          | Remarks   |
|----------------|-------------------------|---|
| 01             | illegal function code   | Function code not supported<br>by wired controller                            |
| 02             | illegal data<br>address | The address sent in query or setting is<br>undefined in the wired controller  |
| 03             | illegal data<br>values  | The set parameter is an illegal value, which exceeds the reasonable set range |

If 138 address of Modbus control switch is not written as "1", all but 138 addresses can not be written.

## 5.3 Address mapping in register of wired controller

| Addresses below can be used as 03(Read Holding Registers)<br>,06(Write Single Register), 16(Write Multiple Registers ) |                        |   |
|--|------------------------|---|
| Data Content   | Address<br>of Register | Notes   |
| Modset   | 0                      | Normal Heat Pump: (1 Cooling、2 Heating、<br>4 DHW、8 Off)<br>Read only while the host remote control<br>state is enabled.<br>Only Cool & Free Cooling:1 Cooling、8 Off |
| Outlet water temp.<br>set(Tws)   | 1                      | Only Cool & Free Cooling :<br>(Max(-8, TSafe) ⊂ ~20 ⊂)<br>Normal Heat Pump : (TwsMin ⊂ ~20 ⊂)<br>HEAT MODE ( 25 ⊂ ~55 ⊂)  |
| Second target<br>temp. set(Tws)  | 2                      | Only Cool & Free Cooling :<br>(Max(-8, TSafe) ⊂ ~20 ⊂)<br>Normal Heat Pump : (TwsMin ⊂ ~20 ⊂)<br>HEAT MODE ( 25 ⊂ ~55 ⊂)  |
| Water Set<br>Tempture T5S  | 4                      | 30 C ~60 C (Available for single<br>pump)<br>For no DHW machine, any write<br>operation on this register is invalid.  |
| Snow-blowing switch  | 7                      | 1:Enable<br>2:Disable   |

| Silent Mode        | 100 | 1:Standard mode<br>2:Silent mode<br>3:Night silent mode 1<br>4:Night silent mode 2<br>5:Night silent mode 3<br>6:Night silent mode 4<br>7:Super silent mode             |
|--------------------|-----|---|
| DOUBLE<br>SETPOINT | 101 | Enable/Disable 1/0  |
| SETPOINT<br>COOL_1 | 102 | Only Cool & Free Cooling :<br>(Max(-8, TSafe) C ~20 C)<br>Normal Heat Pump(TwsMin C ~20 C)  |
| SETPOINT<br>COOL_2 | 103 | Only Cool & Free Cooling :<br>(Max(-8, TSafe)℃ ~20℃)<br>Normal Heat Pump : (TwsMin℃ ~20℃)   |
| SETPOINT<br>HEAT_1 | 104 | (25~55°C)   |
| SETPOINT<br>HEAT_2 | 105 | (25~55°C)   |
| DHW SWITCH         | 115 | <ol> <li>Enable</li> <li>Disable</li> <li>(Available for single pump)</li> <li>For no DHW machine, any write</li> <li>operation on this register is invalid.</li> </ol> |

| Modbus Control switch         | 138 | 1: Enable<br>0: Disable |
|-------------------------------|-----|-------------------------|
| LOW<br>OUTLETWATER<br>CONTROL | 148 | (0∽20℃)                 |

Note: 06, 16 Write register, if the value is written beyond the scope of the note, the exception code is returned.

Addresses below can be used as 03(Read Holding Registers), 06(Write Single Register)

| Data Content                                      | Address<br>of Register     | Notes   |
|---|----------------------------|---|
| FORCED HEAT2<br>ON                                | 202+( Unit<br>Address)*100 | Enable/Disable<br>1/0(Available for multiple pump)<br>Set as 1 is invalid before HEAT2<br>ENABLE is set as YES. |
| DHW SWITCH  | 206+( Unit<br>Address)*100 | Enable/Disable<br>1/0(Available for multiple pump)  |
| DHW MODE<br>ON/OFF                                | 207+( Unit<br>Address)*100 | Enable/Disable<br>Set as 1 is invalid before DHW SWITCH<br>is set as YES.<br>1/0(Available for multiple pump)   |
| Water Set T<br>emperature of the<br>selected unit | 217+( Unit<br>Address)*100 | (30 ℃~60 ℃)<br>(Available for multiple pump)  |

Note: 1. 06 Write register, if the value is written beyond the scope of the note, the exception code is returned.

2. Unit Address stands for machine address 0-15, 0 stands for host 0.

| Addresses below can be used as 03(Read Holding Registers) |                            |   |  |

| Tsafe                            | 289+( Unit<br>Address)*100 | Uints: 1 <sup>°</sup> C (Available for Only Cool<br>& Free Cooling)   |
| MainBoard<br>Software Version    | 292+( Unit<br>Address)*100 | Mainboard software version(0 stands for the unit has no version data) |
| MainBoard<br>EEPROM Version      | 293+( Unit<br>Address)*100 | Mainboard software version(0 stands for the unit has no version data) |

Note: Unit Address stands for machine address 0-15, 0 stands for host 0.

## NOTE CONCERNING PROTECTION OF ENVIRONMENT

This product must not be disposed of via normal household waste after its service life, but must be taken to a collection station for the recycling of electrical and electronic devices. The symbol on the product, the operating instructions or the packaging indicate such disposal procedures. The materials are recyclable in accordance with their respective symbols. By means of re-use, material recycling or any other form of recycling old appliances you are making an important contribution to the protection of our environment. Please ask your local council where your nearest disposal station is located.
